SCHOOL ELECTION HELD TOMORROW

ONLY ONE POLLING PLACE, THE BASEMENT OF THE LIBRARY

NOT MUCH INTEREST

The Poll Will Open at 7 o'clock and Will Close at 6 p. m.—Vote for the Schools.

Maryville is to have an election tomorrow when the voters o fthis school district will vote on the proposition of bonding the district for $75,000 for an addition to the central school building and of voting on the school levies. There has been very little interest taken in this election but the supporters of these propositions think they will carry by a good vote.

There will be only one polling place for the election tomorrow—the basement of the library building. The poll will be open from 7 o'clock in the morning until 6 in the evening. On the levies a majority vote is required while on the building loan it will take a two-thirds majority.

The propositions to be voted are:

A levy of six mills for the maintenance of the school.

A levy of two and one half mills for repairing and furnishing buildings of the district.

A bond issue of $75,000 for an addition to the Central building.

The election of two directors— L. E. Carpenter and E. E. Williams.

FRENCHMAN INVENTS A NEW SUPERCANNON

Will Shoot 100 to 120 miles—Shell Leaves Muzzle at Speed of 4178 Ft. Per Second.

Paris, April 5—Delamare Maze, a French inventor, yesterday sold to the French government the patent of a new long range gun which after thorough tests has shown it has a range of from 100 to 120 miles. The shell leaves the muzzle of this gun at a speed of approximately 4,178 feet per second.

Premier Lloyd George announced in the British parliament recently that England had been negotiating with France to secure the right to use the plans for the new gun, and the Belgian government is now manufacturing a similar cannon at Liege. American military attaches in Europe have written to the government asking that American representatives may be present at tests of the weapon.

In connection with the development of this piece of ordnance is called "the Turbon canon," it may be recalled that two years ago last Tuesday the Germans began to bombard Paris with their long raange "Big Berthas," the shells falling in the city as if from another planet. This bombardment was one of the sensational developments of the great March drive of the German hosts against the British and French on the Picardy front.

Mrs. Jennie Bantz returned home last night from St. Louis where she has been visiting for several moonths with her daughter, Mrs. B. D. Null.

CO. FARM BUREAU OUTLINES WORK

A part of the meeting was devoted to a discussion of the bill now pending in congress, known as the Nolan bill proposing to levy a tax of one per cent on all land holdings in excess of ten thousand dollars.

Picture of a Crowded Class at the High School

This photograph taken at the high school last week shows how crowded our domestic science department is now. Two sets of classes and two different teachers are using this room which was built for only one class. When the bond issue is approved we will have room to expand this department so that classes will not be so crowded.

ABOUT W. A. BLAGG

Editor Charles D. Morris of the St. Joseph Gazette had the following in Sunday's Gazette about W. A. Blagg of this city:

Wesley Blagg of Maryville, informs me that he will not be a candidate for the Democratic nomination for congress in this district. Blagg is a capable, clean man and a loyal Democrat. Many thought he would aspire to Congressman Booher's seat in the lower house, but he says no. He has a good law practice and operates a farm for recreation. He prefers to remain at case here in Missouri, surrounded by friends who admire and respect him, to joining a long list of contestants for a doubtful political honor.

HEAVIEST SNOW STORM OF YEAR

A 10-INCH FALL WITH STRONG WINDS—ROAD IMPASSABLE

RAILROADS ARE TIED UP

Temperature This Morning was 6 Above, Being the Coldest April Day Known Here.

The heaviest snowfall of the winter fell in Maryville all day Saturday and Weather Observer Brink estimated the fall at 10 inches. On account of the strong wind the snow filled up the cuts and some of the drifts are reported from four to six feet deep. It was also the heaviest snowfall ever recorded for April during the past twenty six years.

The temperature this morning was thecoldest for April, it being 6 above. The coldest previous record was April 1, 1910, when it was 10 above.

On account of the storm, the roads out in the county are impassable. The rural carriers out of the Maryville postoffice were unable to make their full delivery today.

According to the records of Mr Brink, there has been several snow storms during April during the past twenty six years. His records show the following.

In 1899 on 2, 3, 4, and 5 total snow fall 5 inches.

In 1901, on 5, 1 inch.

From 1904 to 1910 there were snow storms during each year of this period during the month of April. Also for the years, 1912, 1916 and 1917. The latest snow recorded for April was in 1909 on April 30.

Traffic on the Wabash was badly demoralized Saturday night and Sunday. All trains were late Saturday evening and on Sunday the morning passenger train arried at 5:30 o'clock in the afternoon, just twelve hours late, and passenger train No. 12, due here at 10:45 a. m., arrived yesterday evening at 7:45 p. m. The trains on the Wabash today are running just a little late today.

The trains on the Burlington were also running a little late yesterday.

Salina, April 5—All April low temperature records in the Kansas wheat belt were smashed today when 6 above was registered. All fruit has been killed and the wheat and alfalfa protected by the deep snow is believed to be safe.

David W. Griffith's New Picture at Empire Tonight.

Charming indeed, is the story of "True Heart Susie," David W. Griffith's new Arteraft picture which will be shown at the Empire Theatre tonight. It is one of those pastoral themes which rise to the dignity of screen classics by reason of the artistry of this master producer, and which invariably hold their own against criticism.

This is a fascinating story of a little Hoosier girl, who loves a boy with rare devotion, the heart interest is supreme and the suspense woonderfully compelling. Dorothy Gish plays the part of Susie May Trueheart and Robert Harroon the part of William Jenkins.

REMARKABLE RECOVERY

Extraordinary Curative Power of Lydia E. Pinkham's Vegetable Compound.

Philadelphia, Pa.—"I want to let you know what good Lydia E. Pinkham's Vegetable Compound has done me. I had organic troubles and am going through the Change of Life. I was taken with a pain in my side and a bad headache. I could not lie down, could not eat or sleep. I suffered something terrible and the doctor's medicine did me no good at all—my pains get worse instead of better. I began taking the Vegetable Compound and felt a change from the first. Now I feel fine and advise any one going through the Change of Life to try it, for it cured me after I had given up all hopes of getting better. You can publish this and I will tell any one who writes to me that good it has done me."—Mrs. MARGARET DANZ, 1525 N. Alder St., Phila., Pa.

It hardly seems possible that there is a woman in this country who will continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, proving beyond contradiction that this grand old medicine has relieved more suffering among women than any other medicine in the world.

Terrible Tortures From Itching Skin Diseases

No Sure Relief Until the Cause Is Removed.

When the blood becomes infested with millions of tiny disease germs that attack the skin, then the fiery irritation and intense itching will remain with you until these germs are removed from the blood.

Genuine relief therefore, can only be expected from a treatment that goes right to the seat of the trouble, and strikes at its cause. Such a remedy is S. S. S., the reliable old blood purifier that kills the germs of disease, and sends a new supply of rich red blood coursing through the veins.

S. S. S. has been used successfully in some of the worst cases of eczema and other skin disorders.

BETTER THAN CALOMEL

Thousands Have Discovered Dr. Edwards' Olive Tablets Are a Harmless Substitute

Dr. Edwards' Olive Tablets are the result of Dr. Edwards' determination not to treat liver and bowel complaints with calomel. For 17 years he used these tablets (a vegetable compound) mixed with olive oil) in his private practice with great success.

They do all the good that calomel does but have no bad after effects. No pains, no griping, no injury to the gums or danger from acid foods—yet they stimulate the liver and bowels. Take Dr. Edwards' Olive Tablets when you feel "lazy" and "heavy." Note how they clear clouded brain and perk up the spirits. 10c and 25c a box.

EASTER IS GOVERNED BY THE MOON, NOT ON SAME DATE

When is Easter?

This is a question that is asked each year, and surprise often is expressed that Easter does not come on a fixed date, like Christmas. As a matter of fact, Easter cannot come on a fixed date because it is governed by the moon, and the moon is the symbol of changeableness.

The method by which Easter is now determined is that of the first Sunday after the paschal full moon, that is, the fourteenth day of the calendar moon, or the full moon which happens upon or next after March 21. If the full moon happens on a Sunday, then Easter is the following Sunday. Thus Easter Day cannot come before March 21. It has not come that early in more than a century and a half. Once in the last century it came on March 22, twice on March 23, and once this century, in 1913, on March 23.

The time of Easter may vary nearly six weeks. Often it comes near the first of April as it does this year. Frequently it falls near the middle of the month, and sometimes near the close.

Easter is the only great festival in Christian countries that depends directly upon the monthly motions of the moon. At the same time, it is affected by the yearly motion of the sun, since its date is governed by the vernal equinox, the point in the year when the sun crosses the equator from southern into the northern hemisphere.

The date of Easter could not be absolutely fixed because of the custom of celebrating it on a Sunday. But as an astronomer pointed out centuries ago, a reasonable degree of regularity could be introduced by making Easter the first Sunday after the equinox without regard to the phase of the moon.

The existing system of determining the date of Easter is based upon a discovery made more than four hundred years before Christ by the Greek astronomer Meton.
